**D**igitalisation, Robotics and Automation (DRA) are fundamentally changing the manufacturing / service processes across the globe as the key drivers for the **4th Industrial Revolution (Industry 4.0)**. Their structured implementation leads to major improvements in quality, raising of productivity levels, improvements in operational efficiencies and real time monitoring and control of end-to-end business processes through data analytics.

With a view to create a repository of the best and innovative practices in “Digitalization, Robotics & Automation- Industry 4.0” among Indian industries, **Confederation of Indian Industry (CII) Institute of Quality** is organizing its **11th National Competition on Digitalisation, Robotics and Automation (DRA) – Industry 4.0** to support Government of India’s “**Make-in-India**”, “**Digital India**” & “**Atmanirbhar Bharat**” campaign by enhancing the competitiveness of Indian Industry in the global market.

The competition is intended to serve as a bench marking forum and showcase the best cases demonstrating adaption of the emerging world class technologies and building resources in the journey towards **Industry 4.0** implementation .

The competition will bring together the designers, practitioners and innovators of DRA - Industry 4.0 from a wide range of industrial activities including digital product / process design, mass customization, robotics, real time monitoring and control, logistics and material movement. Besides recognizing the outstanding achievements, the forum will provide rare learning opportunity of the state-of-the art to all those taking part of attending the event.

Automation / Digitalisation / Robotics gadgets manufactures, suppliers, service providers & integrators are encouraged to share their presentations on latest technology and its application in industry, to enhance the know how of users on latest technology and its applications for implementing in their respective organisations.

## OBJECTIVES

- ★ To recognize the best in class practices for advancement & implementation of Digitalisation, Robotics & Automation (**Industry 4.0**)
