

# Cybersecurity Conclave: Standards and Regulatory Framework in Indian Landscape

## Details

### Time & Date

Thursday, 2nd March  
2023, 10am-5.30 pm IST

### Venue

Radisson Blu Plaza Delhi Airport  
National Highway 8,  
New Delhi – 110037, India

### Event themes/sessions

- Global Regulatory framework in Cybersecurity
- Cybersecurity and Safety in Medical Devices
- Cybersecurity in Industry
- Cyber resilience: Need for future

In today's era the cybersecurity challenge is becoming even more complex and difficult given the ubiquitous nature of the online and digital world: the ability of malicious actors to operate from anywhere in the world, the linkages between cyberspace and physical systems, and the difficulty of reducing vulnerabilities in complex and connected cyber networks in IoTs. With each day passing by, technological capabilities are becoming more sophisticated to disrupt, destroy and exploit citizens' privacy and a nation state's delivery of essential services.

A robust regulatory and standards framework becomes the need of the hour to protect not only our critical infrastructure but to also ensure that a citizen's right to privacy is not encroached upon. The TIC Council-CII-IQ's jointly organized cybersecurity conclave will delve into the current standards and regulatory cybersecurity framework in India and globally. It will drive discussions around how India stays one step ahead of the curve in the current cybersecurity standards and regulatory landscape. The conclave will especially focus on how delivery of essential services and privacy and safety of citizens is secured in three crucial sectors of medical devices, power sector and telecommunications.

**Participants include national and international senior government officials, Policy makers, and industry leaders as speakers and delegates.**
